### 性能表 SPECIFICATION

| 系列 Series     | 最高使用压力<br>(kgf/cm <sup>2</sup> ) | 压力调整范围<br>Pressure Adjusting Range<br>(kgf/cm <sup>2</sup> ) | 重量<br>Weight<br>(kg) |
|---------------|----------------------------------|--------------------------------------------------------------|----------------------|
| JPS-02HM      | 350                              | 30-210                                                       | 1.36                 |
| JPS-02L       | 210                              | 15-60                                                        |                      |
| JPS-02LL      | 60                               | 5-40                                                         |                      |
| JCS-02N(30)   | 350                              | 20-210                                                       | 1.0                  |
| JCS-02NL(30)  |                                  | 15-60                                                        | 1.0                  |
| JCS-02NLL(30) | 60                               | 5-40                                                         | 1.0                  |
| JCD-02S       | 50                               | 4-26                                                         | 0.8                  |
| MJCS-02P      | 350                              | 30-210                                                       | 1.64                 |
| MJCS-02A      |                                  |                                                              | 2.37                 |
| MJCS-02B      |                                  |                                                              | 2.37                 |
| MJCS-02W      |                                  |                                                              | 2.37                 |
| MJCS-02PL     | 210                              | 15-60                                                        | 1.64                 |
| MJCS-02AL     |                                  |                                                              | 2.37                 |
| MJCS-02BL     |                                  |                                                              | 2.37                 |
| MJCS-02WL     |                                  |                                                              | 2.37                 |
| MJCS-02PLL    | 60                               | 5-40                                                         | 1.64                 |
| MJCS-02ALL    |                                  |                                                              | 2.37                 |
| MJCS-02BLL    |                                  |                                                              | 2.37                 |
| MJCS-02WLL    |                                  |                                                              | 2.37                 |
| MJCS-03P      | 350                              | 30-210                                                       | 2.58                 |
| MJCS-03A      |                                  |                                                              | 3.25                 |
| MJCS-03B      |                                  |                                                              | 3.25                 |
| MJCS-03W      |                                  |                                                              | 3.25                 |
| MJCS-03PL     | 210                              | 25-60                                                        | 2.58                 |
| MJCS-03AL     |                                  |                                                              | 3.25                 |
| MJCS-03BL     |                                  |                                                              | 3.25                 |
| MJCS-03WL     |                                  |                                                              | 3.25                 |
| MJCS-03PLL    | 60                               | 5-40                                                         | 2.58                 |
| MJCS-03ALL    |                                  |                                                              | 3.25                 |
| MJCS-03BLL    |                                  |                                                              | 3.25                 |
